

GUNNAR NEUMAN

Milwaukee, WI | +1 (608) 445 - 6191 | gunnarneuman14@gmail.com

SUMMARY

AI product and implementation professional focused on translating business problems into practical products, workflows, and systems. Brings hands-on building capability alongside experience working across customers, operations, stakeholders, and delivery teams.

WORK EXPERIENCE

AI Product Builder | GunnarNeuman.com

Milwaukee, WI | Oct 2025–Present

- Developed a fully featured home-services CRM demonstration that integrates AI across customer calls, lead qualification, call summaries, follow-up, quote preparation, appointment coordination, and review management, with human approval controls for customer-facing actions.
- Created an AI review intelligence service for local businesses that monitors public reviews and delivers recurring email reports with reputation changes, customer themes, risk alerts, draft responses, and prioritized improvement recommendations.
- Built a live AI interview platform that uses a candidate's résumé and target job description to generate and conduct personalized mock interviews.
- Engineered and stress-tested a blockchain token-launch platform on the Aptos testnet, including concurrent launch testing across multiple wallets.
- Designed a print-on-demand topography product connecting custom map generation, product customization, and e-commerce workflows.

Founder | TouchPoint Marketing Solutions

Denver, CO | Mar 2023–Oct 2025

- Worked directly with small-business clients to scope and deliver websites, e-commerce work, customer acquisition campaigns, and reporting.
- Managed projects from initial conversations through implementation, launch, performance review, and ongoing updates.
- Used campaign and customer data to report results and adjust marketing activity.
- Coordinated timelines, budgets, vendors, and client communication across multiple projects.

Sales Rotational Program | Sub-Zero Group, Inc.

Madison, WI | Jun 2020–Feb 2023

- Selected as the inaugural participant in a 2.5-year rotational program spanning sales operations, product marketing, product launch, showroom sales, and dealer support.
- Supported cross-functional product launches through competitive research, positioning, naming, imagery, sales materials, and retail execution.
- Built custom Power BI reporting tools and trained external sales teams to use them, helping users access and apply sales data more effectively.
- Gathered dealer and distributor feedback, supported product training, and translated product information into practical sales and customer-facing resources.

SKILLS & TOOLS

- AI & Product: AI-enabled workflow design, human-in-the-loop systems, prompt design, product requirements, rapid prototyping, customer discovery, implementation planning
- Technical: React, TypeScript, Claude, Codex, Cursor, v0, Power BI
- Business: Stakeholder discovery, client management, sales operations, ROI communication, training, cross-functional delivery, go-to-market strategy
